Important **Safety** Information

Possible Fall Hazard

- Follow manufacturer's assembly and installation instructions carefully. Failure to do so may result in accidental window falls.
- Window opening control device is designed to protect against accidental window falls by children five years and younger.
- Window opening control device is not a substitute for careful supervision of all young children.
- Keep window opening control device engaged unless needed for use in an emergency.

Young Children may fall through an open window if all instructions are not followed:

- Use recommended materials and techniques.
- Make sure the window opening control device is securely attached to the window sash.
- Make sure that the window is in good condition.

No window rescue above 75 feet (6th floor)

- Fire rescue ladder may not reach beyond 75 feet (6th floor)
- Do not rely on being rescued from windows above 75 feet (6th floor). Follow building fire escape plan.

Blocks escape in fire and emergency unless released

- Follow instructions on reverse side to properly operate the window opening control device to open window.
- Never apply padlock or devices that require a key or tool to unlock them to the window opening control device.

Less than 4" so that a rigid sphere can not pass through.

Installed too high or not engaged.
